

December 20, 2017
Fuji Machine Manufacturing Co., Ltd.

Nine additional major manufacturers have become members of Fuji Smart Factory, which brings the total to 18 companies.

Fuji Smart Factory is an initiative to standardize communication rules between manufacturers of electronic production equipment to advance the use of IoT in manufacturing. By connecting Fuji Nexim together with production equipment from Fuji Smart Factory members, SMT production lines that extend beyond the boundaries of companies can be realized.

Fuji along with Fuji Smart Factory members are working to contribute to the production of high quality products and achievement of high overall equipment effectiveness at user sites.
