FUJI CORPORATION

Notification of cooperation with ASYS Group and Viscom

Fuji Corporation is pleased to announce the addition of ASYS Group and Viscom to the Fuji Smart Factory members.

Through the standardization of the communication protocol between machines installed to an SMT line, ASYS's conveyance machines and Viscom's inspection equipment can connect to Fuji's Smart Factory with Nexim to create a parts placing system that extends beyond the boundaries of corporations.

The addition of these two companies brings the total number of Fuji Smart Factory members to 20 companies.

This significantly contributes to the production of high quality products and high OEE at user sites.
